

Luxury Foot Spa /Foot Bath By Medisana

Well cared for feet not only look good, they are generally speaking also healthy.

Just a few minutes' attention to your feet per day suffice for highly stressed feet to feel good and cope with the daily chores without pain.

An important part of health regarding foot care is a relaxing foot bath and as foot massage.

The Medisana Luxury Foot Spa / Foot Bath offers the best pre-requisites for this.

It makes a powerful foot massage with or without water possible, an intensive reflex zone massage and infrared light heat radiation too.

If required, the device can be used for the massage or spray function only or it can also be combined with the infrared radiation.

Whatever you select, the varied applications help you to achieve an effect for body and soul which most people find pleasant and relaxing.

Equipped with vibrating massage nipples, an air spray bar, massage jets and exchangeable acupressure inserts, the Luxury foot spa enables a foot massage from the sole to the foot instep.

The foot massage supplies the tissue layers better with blood and can thus unblock veins and lymphoid vessels.

Tense muscles can be loosened and painful joints soothed. The metabolism in the cells is stimulated

Infrared radiation

The infrared radiation penetrates the soles of the feet pleasantly and can make a far-reaching heat therapy possible.

Heat treatment

The foot spray bath heats the water in the device to a pleasant temperature and ensures that the temperature remains constant during use.

Aromatherapy

A depression is embedded in the **Medisana** foot bath for the addition of aromatic substances and bath salts.

The added substances mix slowly with the water and intensify the relaxing effect of the foot bath.
